Detail-oriented BCA student with strong foundation in data analysis, machine learning, and backend development. Experienced in building predictive models, performing data preprocessing, and deploying applications using Flask. Seeking a Data Trainee role to leverage analytical and problem-solving skills in real-world data environments.

Education

Bachelor of Computer Application

Birendra Multiple Campus, Tribhuvan University
8th Semester Running

Projects

Sales & Profit Analysis + Predictive Model

- Performed data preprocessing including cleaning, feature encoding, and transformation on structured datasets.
- Built a machine learning model achieving approximately **80%+ prediction accuracy**.
- Developed and deployed a Flask-based web interface for real-time profit prediction.

Tihar Sales Analysis: Customer & Market Insights

- Performed exploratory data analysis on a synthetic Tihar sales dataset using **Pandas, NumPy, Matplotlib, and Seaborn**.
- Cleaned and transformed data, and analyzed customer segments by gender, age, region, and occupation.
- Identified key purchasing trends and top-performing product categories through data visualization.

Wistie – Friendship Matchmaking Website

- Developed a full-stack web application using PHP, MySQL, and JavaScript.
- Designed matching algorithms to recommend compatible users based on interests.
- Optimized SQL queries to improve data retrieval efficiency.

Technical Skills

Programming: Python (NumPy, Pandas, Flask), SQL (Joins, Aggregations, Optimization)

Tools: Git, Excel, Jupyter Notebook, VS Code, PyCharm, DBeaver

Concepts: Machine Learning (Beginner), Data Analysis, ETL Basics, DBMS, OOP

Operating Systems: Windows, Basic Linux

Certifications

- Data Analysis with Python – Simnnyx
- 3-Day Intensive Workshop on AI and Python Programming

Strengths

- Strong analytical thinking and problem-solving
- Fast learner with high adaptability
- Effective communication and collaboration skills
