Programming: Python, Flask, JavaScript

Tools: Git, DBeaver, pgAdmin, Linux Basics

WORK EXPERIENCE

Database Assistant Intern

DataCore Solutions, Kathmandu, Nepal

2024 - 2025

- Managed relational databases and performed SQL-based data operations.
- Created and optimized SQL queries to improve database performance.
- Assisted with database backup, recovery, and maintenance activities.
- Monitored database performance and resolved database-related issues.
- Applied access control practices for improving data security.

PROJECT EXPERIENCE

AI Recruitment Management System

- Designed and managed database models using SQLite and SQLAlchemy ORM.
- Created and maintained tables for users, recruiters, jobs, and applications.
- Optimized database queries for retrieving candidate and job information.
- Implemented role-based access control and secure data handling.

Sales Data Analysis System

- Processed structured datasets using Python and SQL.
- Performed data cleaning, transformation, and analysis.
- Generated insights from database records.

EDUCATION

Bachelor of Computer Application (BCA)

Birendra Multiple Campus, Tribhuvan University

GPA: 3.32

CERTIFICATIONS

Data Analysis with Python
Machine Learning Basics
Database Management and SQL Training

KEY STRENGTHS

Strong SQL problem-solving skills
Database troubleshooting ability
Knowledge of database security practices
Analytical thinking and attention to detail
